

PREPARING THE FILE

1. Define model scale
2. Drawing units must be millimeters
3. Line weight must be 0,00mm
4. Each cut type has a different layer and color:

Red: inside cut

Green: outside cut

Black/white: engrave

5. Every drawing line must be a closed polyline. Make sure there are no lines one on top of another.
6. The pieces must fit in a 630x450mm printable area, separated 1mm or more amongst them.
7. The file must be saved as Autocad 2004
8. Materials that can be cut:

Methacrilate up to 5mm thick.
Wood up to 5mm thick.
Paper-cardboard
Formica
9. Consult for a different material.
